Purpose Start End

The purpose of this 5th and last meeting of the PAGAC was for the 9 subcommittees, the Pregnancy Work Group, and the Fitness Work Group to report out and discuss with the whole committee their findings and conclusions in regard to their systematic review of the scientific literature on their questions.

In addition, they had in-depth discussions on a variety of topics that will be included in their report to the HHS Secretary: transition issues, youth to adults, and adults to older adults; sedentary behavior; resistance training; special populations; and safety.

19. Federal Staff Support Years (FTE)	1.95	0.00

20a. How does the Committee accomplish its purpose?

The Committee initially determined the topic areas that it explored through systematic reviews of the scientific literature on relation of physical activity to a variety of health outcomes and then formed 9 subcommittees around those topic areas. The subcommittees utilized a state-of-the-art systematic review process to review, evaluate, and synthesize published, peer-reviewed research. Its rigorous, protocol-driven methodology is designed to maximize transparency and minimize bias. For some topics, the Committee utilized existing high-quality reports from leading scientific organizations or Federal agencies or existing systematic review or metanalyses to prevent duplication of effort. The summary of its work was documented in its report to the Secretary.

20b. How does the Committee balance its membership?

Every effort was made to ensure that the Committee membership is fairly balanced in terms of points of view represented for the Committee's function. In the selection process, consideration was given to ensure a broad representation of geographic areas, academic institutions, gender, race, ethnicity, and disability to the extent possible. The Committee consists of respected published experts in designated fields and specific specialty areas. Members have demonstrated expert knowledge of current science in the field of human physical activity and health promotion or the prevention of chronic disease. They have experience in one or more of the following specific specialty areas related to physical activity: health promotion and chronic disease prevention; bone, joint, and muscle health and performance; obesity and weight management; physical activity and risk of musculoskeletal injury; physical activity and cognition; physical activity within specific settings, such as preschool/childcare, schools (e.g. activity breaks, physical education), or the community/built environment; physical activity dose-response; sedentary behavior; behavior change; systematic reviews; and special populations including children, older adults, or individuals with disabilities.

The Committee was established to perform a specific, time-limited task. The 2018 Committee's first meeting was in July, 2016 and held a total of 5 meetings to accomplish its mission, 3 in FY 2017 (held 10/27-28/2016; 3/23/2017 and 7/19-21/2017) and 1 in FY 2018 (10/17-20/2017).

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Committee was established to provide up-to-date expert evaluation of the science through extensive systematic literature reviews to support the development of Physical Activity Guidelines for Americans. There is no other existing source of this information.

20e. Why is it necessary to close and/or partially closed committee meetings? N/A

21. Remarks

The Committee was initially established in June 2007 to review existing scientific literature to identify sufficient evidence to develop a comprehensive set of specific physical activity recommendations. The Committee reviewed and evaluated the scientific evidence relating physical activity to health outcomes for the general population and selected subgroups. In May 2008, the Committee submitted its recommendations in its report to the HHS Secretary documenting the scientific background and rationale for the "2008 Physical" Activity Guidelines for Americans" and then was terminated. The Committee was re-established in June 2016 to review the 2008 PAG and conduct evidence-based systematic literature reviews of physical activity and health topics. It developed a report and submitted it on 2/22/18 to the Secretary of recommendations for new or revised physical activity guidelines; the Committee's report can be found at https://health.gov/paguidelines/second-edition/report.aspx . The Committee was then terminated as per its charter. HHS will take these recommendations along with comments from Federal agencies and the public on the committee's report and develop the 2nd edition of the "Physical Activity Guidelines for Americans" which is planned to be released in late 2018.

Narrative Description

The Committee was established to produce a report to summarize the science relating physical activity to health. This report will support the HHS development of the 2nd edition of the Physical Activity Guidelines for Americans, with a planned 2018 release date.

What are the most significant program outcomes associated with this committee?

Improvements to health or safety

Trust in government

Major policy changes

Advance in scientific research

Effective grant making

Improved service delivery

Increased customer satisfaction

Implementation of laws or regulatory requirements

Other

Outcome Comments

NA

What is the approximate <u>Number</u> of recommendations produced by this committee for the life of the committee?

1

Number of Recommendations Comments

The Committee developed a report of 700+ pages that summarizes the science relating physical activity to health outcomes. It can be found at https://health.gov/paguidelines/second-edition/report.aspx.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Fully</u> implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

The Committee's report will serve as the basis for the 2nd edition of the Physical Activity Guidelines for Americans, to be created and disseminated by HHS. It is expected to be released near the end of CY 2018.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Partially</u> implemented by the agency?

% of Recommendations Partially Implemented Comments
